Profile

B.Tech (**AI/ML**) student with hands on experience in machine learning, deep learning and agentic AI. Built ML pipelines (Scikit-learn, XGBoost) and deep learning models (CNN, LSTM) for forecasting and computer vision, plus multi agent LLM systems with RAG (LangChain, LangGraph, Llama via Groq). Proficient in Python, FastAPI and Docker for production deployment. 1st Prize in Agentic AI Competition (IIST Indore); Top 10 National Finalist, Clear Skies Challenge 2025 (IIT Tirupati); Cummins Scholar 2026.

Education

2023 – 2027 **Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning**
Indore Institute of Science and Technology
CGPA: 8.6/10

Professional Experience

08/2026 – 10/2026 **AI/ML Intern | Ccube Infotech Pvt. Ltd.**
Indore, India

- Built a FastAPI LLM gateway with a unified request/response schema across OpenAI, Gemini, Claude and Ollama models, with per request generation controls and token/latency reporting.
- Implemented embedding based model routing: FastEmbed prompt embeddings matched to task profile centroids in Redis vector search, with a similarity threshold, fallback model and route decision endpoint.
- Built provider agnostic vector DB adapters for Weaviate, Pinecone, Milvus and ChromaDB with a common insert/query/delete interface for RAG microservices.
- Built token based, semantic, parent-child and document-aware chunking services to improve RAG retrieval quality.
- Developed MCP connectors for GitHub, Salesforce, ServiceNow, Slack, Google Workspace and Microsoft, plus MCP servers and a central registry exposing internal microservices to AI agents.
- Designed a workspace scoped autotagging microservice mapping free text to structured fields via embedding similarity with confidence thresholds.
- Delivered reusable AI microservices used across the company's enterprise AI products (**Intelliconnect**, **Arccleo**).

Skills

Machine Learning
Scikit-learn, XGBoost, Linear/Logistic Regression, K-Means Clustering, Isolation Forest, Feature Engineering

Deep Learning & Computer Vision
PyTorch, TensorFlow, Keras, CNN, LSTM, OpenCV, MediaPipe, Anomaly Detection

MLOps & Deployment
FastAPI, Flask, REST APIs, WebSockets, Docker, Git, GitHub Actions (CI/CD), Microservices

Data Analytics & Visualization
Pandas, NumPy, Matplotlib, Seaborn, Power BI (DAX), EDA, SQL

Tools
Jupyter Notebook, Google Colab, VS Code, Streamlit, n8n, Supabase

Agentic AI & LLMs
LangChain, LangGraph, Multi-Agent Orchestration, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), LLM Routing, Text Embeddings, LLM APIs (OpenAI, Gemini, Claude, Groq, Llama), Chunking Strategies, Prompt Engineering, Tool Calling, Structured Outputs

NLP
Text Preprocessing, Tokenization, Word Embeddings, Named Entity Recognition (basic), LLM-based Text Extraction

Databases & Vector Stores
PostgreSQL, MySQL, Redis (Redis Stack vector search), Weaviate, Pinecone, Milvus, ChromaDB, SQLite

Languages
C, C++, Python, SQL

Projects

PlacePrepAI — AI Powered Interview System
Built PlacePrepAI, an AI-powered mock interview platform that analyzes a candidate's resume, GitHub (GitHub API) and LeetCode data (GraphQL) to generate tailored questions using Llama 3 70B via Groq, then runs a live interview with real-time face tracking (MediaPipe FaceMesh), speech recognition and WebSocket-based interaction.

AI Powered Satellite Emission Tracker (AI-SET)
Built an industrial emission monitoring system using **Sentinel-5P satellite** through (Google Earth Engine), with an LSTM for pollution forecasting **($R^2 \approx 0.89$)** and Isolation Forest for anomaly detection, validated through test scenarios due to scarce labeled data. Served via a FastAPI backend with an interactive dashboard. Top 10 National Finalist among 100+ teams, Clear Skies Challenge 2025 (IIT Tirupati).

Sustainable Fertilizer Recommendation System
Developed an ML-based fertilizer recommendation system using **Random Forest and XGBoost** to predict suitable fertilizers based on soil parameters (N, P, K, pH), crop type, and environmental conditions, with data preprocessing and feature engineering to improve prediction reliability.

Awards

Cummins Scholar 2026 - Awarded for academic excellence, leadership potential, and technical performance.
Top 10 National Finalist (Clear Skies Challenge 2025) - Selected among **100+** teams at GeoSmart India 2025 (**IIT Tirupati**) for AI-SET.
100 Days Coding Streak (LeetCode) - Solved 150+ algorithmic problems, strengthening data structures and optimization skills.

Certificates

- Deloitte Australia - Data Analytics Job Simulation
- Machine Learning with Python — Coursera
- Data Analysis with Python — Coursera
- Power BI Data Visualization Certification — Simplilearn
